[Useful Agent Orange Websites, Videos, Books, and Studies](#)

<http://www.hatfieldgroup.com/services/contaminant-monitoring-agent-orange/useful-agent-orange-websites-videos-books-studies/>

During the course of Hatfield's ongoing [Agent Orange/Dioxin](#) studies in Viet Nam, we have come across a variety of useful and informative references. Below, we provide a sample of resources that we have found useful.

Websites

[Ford Foundation Agent Orange/Dioxin program](#) information

- The [Agent Orange Record](#) – A project of the War Legacies Project about the ongoing health and environmental impacts of the use of Agent Orange, and other dioxin-contaminated herbicides used during the Vietnam war and in other areas of the world.
- [The Vietnam Reporting Project](#) – A journalism fellowship program designed to produce multimedia news coverage on the enduring environmental and health consequences of Agent Orange contamination in Vietnam.
- [Danish Vietnamese Association](#) (DVA) information, links, and documents about Agent Orange
- [Advocacy and Exchange Program on Agent Orange](#) – The Aspen Institute
- [Dioxin NZ Information on Dioxins](#) – New Zealand Chemically Exposed Paritutu Residents Association
- [Agent Orange information](#) from the Vermont based War Legacies Project
- [Operation Ranch Hand \(Thomas Pilsch\)](#)
- [USAF Ranch Hand Herb Tapes, Herbicide Amounts from August 1965](#)
- [Agent Orange Talking Paper #1 by Gary D. Moore](#)
- [Health of Veterans and Deployed Forces – Institute of Medicine \(Viet Nam War\)](#)
- [Chemicals used in military operations during the Viet Nam war](#)
- [Vietnam Veterans of America](#)
- [US Environmental Protection Agency – dioxin assessment](#)
- [The Virtual Vietnam Archive](#); Texas Tech University
- [Toxicological profile for dioxins](#)
- [US Department of Veterans Affairs – Agent Orange: Diseases, Fact Sheets, Briefs, Newsletters, etc.](#)
- [Agent Orange related illnesses – Main](#)
- [Agent Orange related illnesses – Descriptions of Conditions](#)
- [Fund For Reconciliation and Development – Extensive information on Agent Orange](#)

[Q&A: 'Toxic War' - The Story of Agent Orange](#)

<http://www.voanews.com/content/qa-the-story-of-agent-orange/1856154.html>

U.S. involvement in the Vietnam War was long and costly in many ways. The conflict itself raged for more than two decades, but the consequences of military actions taken in Vietnam continue to this day. One of the darkest legacies is the effect of a widely used defoliant meant to quickly clear dense forests and flush out enemy forces. Known as Agent Orange, the chemical induced adverse health issues for both U.S. troops and Vietnamese on both sides of the war.

Peter Sills, an attorney who helped represent the Vietnam Veterans of America in a class action lawsuit regarding the use of Agent Orange, has written about it in a new book titled *Toxic War*. Speaking with VOA's Jim Stevenson, Sills told of the many ways Agent Orange had a direct effect on people, and how it even evolved into a weapon.
